

POST OP INSTRUCTIONS FOR IMMEDIATE DENTURES

Leave denture in for 48 hours, taking out only to clean, after meals.

After 48 hours, leave denture out at night.

Two times a day, clean denture with a brush, soap and water.

Rinse mouth well.

Keep denture in moist environment with a small amount of water.

Be patient, this is going to be a learning process; start with soft foods.

You are going to need adjustments(everyone does). Leave the denture in your mouth for several hours before coming in for an adjustment.

We know your time is valuable and that is important to us, so please call before you come. This will help us to find a time that is convenient.
